

ATTENTION !! ATTENTION!!

To any one who would want to sponsor Aaron to go through a PDC course in November ,Those are some of his photos about his project,but many you can get in his Facebook page,that is, K'ARON COMMUNITY BASED PROJECT (Y.U.P)

here is his story:

Dear friend my name is Aaron Harrison am glad, once again for your time... I started a community project which I started one year ago after finishing my high school level.I gained Interest and passionate in doing permaculture since I found this as the simplest way of farming.I haven't attended any permaculture course while starting this Regenerative project but I found this knowledge from a friend who was also doing permaculture back in his community and share with me more about it and the rest Ideas and skills I used to watch from YouTube and Facebook lite following the permaculture group.

My main objectives of building my interest in this type of farming was that ,I was trying to find a solution to some of the problems my community was facing since they were depending on the inorganic type of farming which is costly and using chemical which interfere with the atmosphere and cause global warming and destroy the environment as well.

So I was trying to build my objective in solving the problems like:

Environmental conservation

Food shortages

Poverty

Malnutrition control

So far have been able to achieve one goal of environmental conservation,I did this through creating awareness on the impact of conserving the environment and doing away with the use of chemical and as per now am glad and happy that many of the community members are now embracing the organic type of farming.

I also do encourage my community members to plants more trees in that,by planting trees they will be able to catch water as the trees act as rain catchment and by doing so they will make the environment looks green and cool too.

Am still working on a way out to achieve the remaining objectives of doing away with:

Food shortages

Malnutrition control

Poverty

And I know by being together,you people can help me achieve the remaining objective.

I would wish to attend a PDC course so that I may gain more knowledge about permaculture and the use the knowledge to help my community towards this journey of regeneration , would be glad to hear positive response from your side ,, thanks for your time.
